Ruler

White Glue

Begin by cutting out all pieces with some white space around them. This makes it easier to cut them out on the lines.

1. Score pieces on dotted lines.
2. Cut outline on solid lines.
3. Fold on dotted lines.
4. Test fit.
5. Glue and hold until set.
6. Repeat.

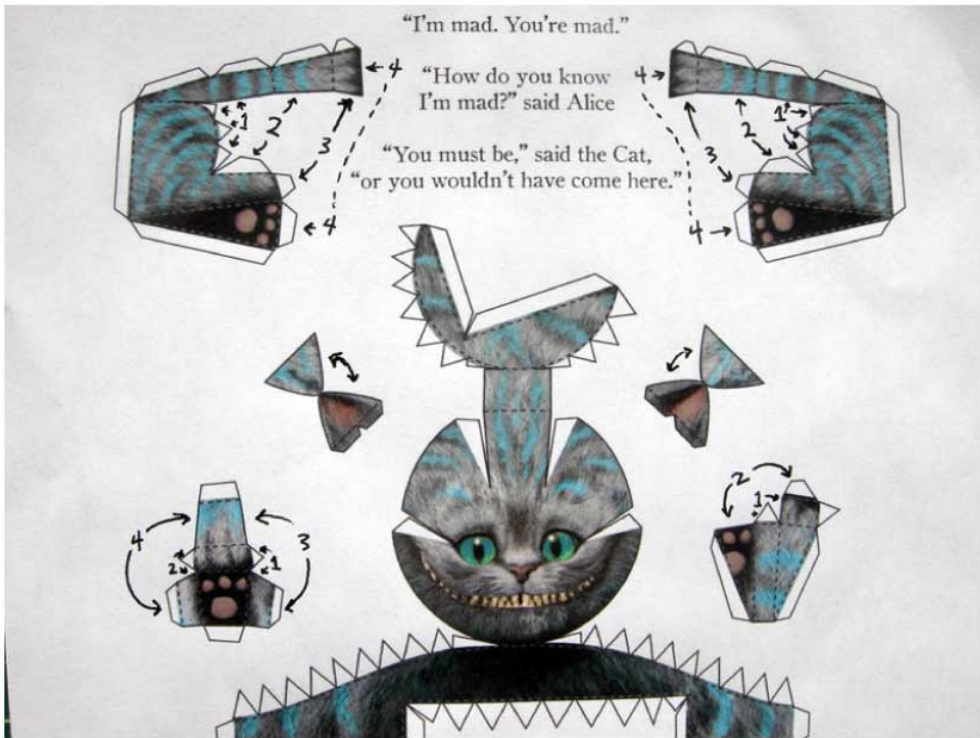

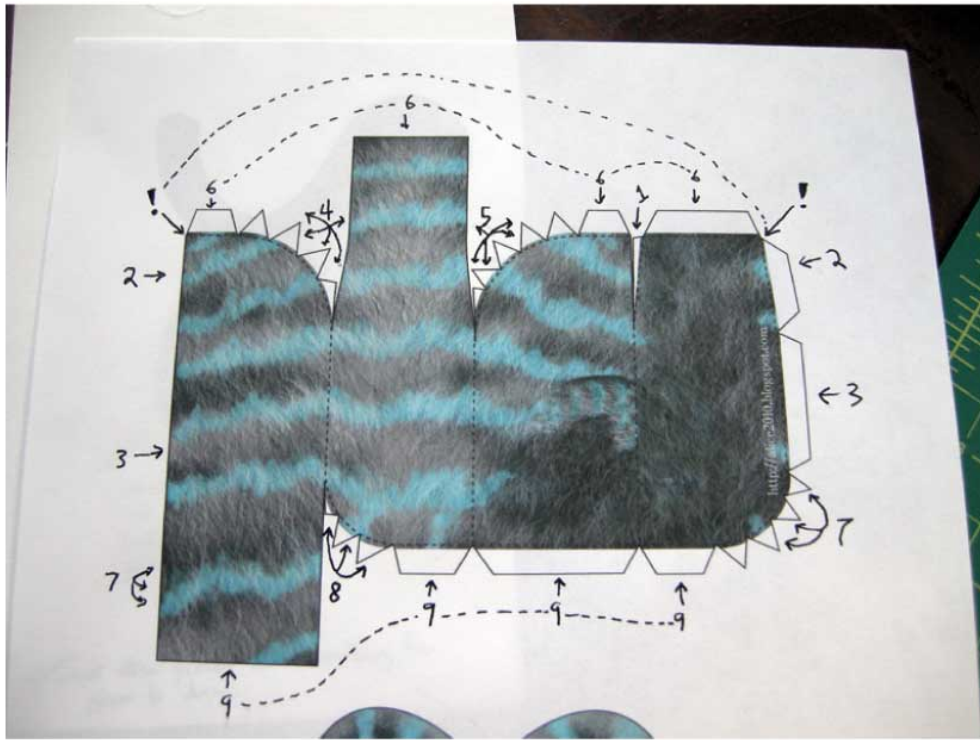

As you fold each piece, the best assembly order may suggest itself.

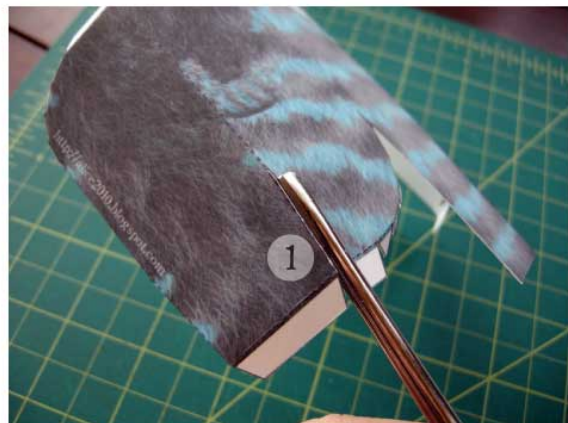

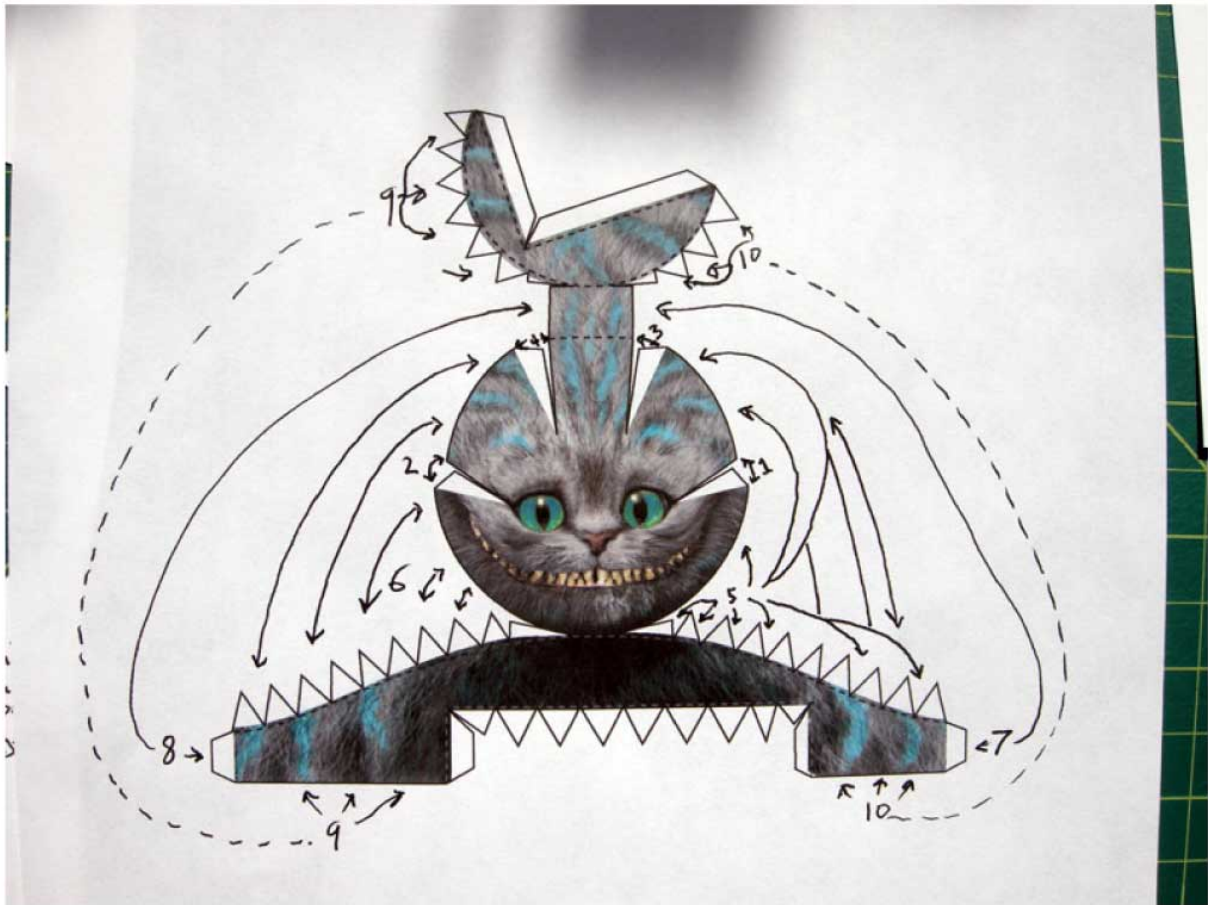

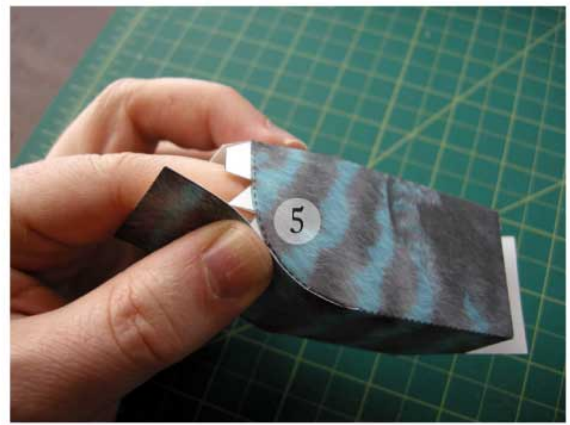

I like white glue applied with a toothpick. If you get the perfect amount, the paper will bond within seconds.

Make sure glue has set before moving on.
